

Women and Newborn Services

Become a Champion of Hope

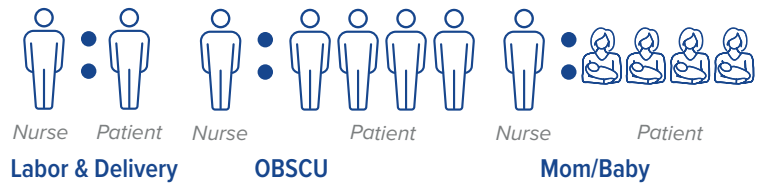

Beds

Deliveries per Month

Safe Patient Ratios

Our Women's and Newborn Service is the tertiary care center for Oklahoma, providing comprehensive care, from low-risk to high-risk obstetrical and newborn care. Our Service includes labor and delivery, obstetrical special care/high-risk antepartum and postpartum care, obstetrical emergency department mother-baby care and new born transition care. We are an official Baby Friendly Hospital, hold the Gold Safe Sleep accreditation, and have earned the Oklahoma Perinatal Quality Improvement Collaborative Spotlight Hospital Award for the last 6 years.

Delivering babies within a children's hospital means that our NICU is a few floors above our unit, and our Prenatal Diagnostic Center is just a few floors below our unit. Our team works closely with multiple medical disciplines for maternal care as well as neonatal-perinatal medicine and other pediatric specialties for the delivery of newborns with complex medical conditions.

Our registered nurses have an active voice in shared governance through unit-based councils focused on high-risk maternal and newborn populations. We work closely across our Service to ensure patients have an excellent experience, and we partner closely with NICU to deliver seamless care to mom and baby. Our provider specialities include obstetrics, maternal-fetal medicine, family medicine and pediatrics.
